

Gina Krieb

Senior Software Engineer

Portland, OR • +1-630-779-6574 • ginakrieb@gmail.com

linkedin.com/in/ginakrieb • ginakrieb.com

Senior Software Engineer with 10+ years of full-stack experience, with recent focus on backend systems and database architecture at scale. Known for breaking down complex technical problems, asking the questions that align product and engineering, and driving technical planning through to execution in ways that move the business forward.

WORK EXPERIENCE

Teachable, Remote December 2023 – July 2026

SaaS platform empowering creators to build and sell online courses to millions of students globally.

Senior Software Engineer II April 2026 – July 2026

- **Core Feature Delivery, Legacy System:** Led backend development for Learning Paths, a new core product feature, untangling tight coupling in a brittle legacy data model to deliver a phased beta release on schedule.
- **Compliance-Ready Data Modeling:** Designed data model extensions to the Learning Paths schema to accommodate anticipated compliance requirements, reconciling product requirements against constraints in a tightly-coupled legacy system.
- **AI Tooling Integration:** Designed a workflow that ingests Jira tickets and codebase context to generate requirements and task breakdowns, with human verification and iterative refinement before execution.

Senior Software Engineer I December 2023 – April 2026

- **Database Architecture Overhaul:** Architected a denormalized read model for the student product catalog, replacing a query-heavy legacy schema that couldn't sustain growth.
- **Query Performance Optimization (14-25x Gains):** Eliminated N+1 patterns and reduced query volume by 90%+, delivering 14-25x performance gains through schema redesign and a Kubernetes-orchestrated backfill of 2.5M+ records.
- **0 to 1 Product Build:** Owned technical design and implementation for a new student dashboard across a NextJS frontend and Rails/PostgreSQL backend.
- **Technical Hiring & Assessment Design:** Contributed to 10+ hiring efforts, interviewing candidates and reviewing take-home assessments against an established rubric, correcting errors in official solution keys and making hire/no-hire recommendations.

Castify (formerly Screencastify), Remote October 2020 – January 2023

Leading EdTech company providing video creation and screen recording tools for 12.4M+ users in K-12 education and business.

Senior Software Engineer August 2021 – January 2023

- **SSO/Authentication System (565K+ Student Contract):** Architected SSO/authentication system that secured contract renewal with the company's largest school district, serving 565,000+ students.
- **Accessibility Audit Initiative:** Initiated and scoped an accessibility audit, identifying cross-departmental recommendations to improve usability across a platform serving millions of users.
- **Engineering Mentorship:** Mentored engineers through code reviews, feedback, and ongoing technical guidance.
- **Technical Interviewing:** Interviewed and evaluated engineering candidates.

Software Engineer October 2020 – August 2021

- **Chrome Extension Development:** Built and maintained features for a Chrome extension, including a video/quiz player, serving millions of users across 70%+ of US school districts.

SnapMobile, Chicago, IL July 2015 – October 2019

Digital product studio partnering with startups and enterprises to design and build scalable web and mobile applications.

Lead Software Engineer

- **Lead Engineer, Full-Stack Delivery:** First engineering hire; built and shipped 25+ full-stack web and mobile applications (MEAN stack, Ionic) for clients ranging from startups to large enterprises.
- **Engineering Team Building & Leadership:** Built and led a team of 5 engineers, owning hiring, onboarding, 1:1s, and mentorship.

- **Production Release Management:** Delivered regular releases to the App Store and Google Play while supporting live production applications.

EDUCATION

Dev Bootcamp, Chicago, IL - Web Development

University of Iowa, Iowa City, IA - BA, Communication Studies · BA, Psychology

TECHNICAL SKILLS

Languages: Ruby, TypeScript, JavaScript, SQL

Backend: Ruby on Rails, Node.js, Express, MongoDB, PostgreSQL, REST APIs, System Design

Frontend: React, Next.js, Angular, Ionic, Tailwind

Testing: RSpec, Jest, Vitest, React Testing Library

Tooling: New Relic, LaunchDarkly

AI Tooling: Claude, GitHub Copilot, Kiro
